

Enjoy an Incredible Career at Centura Health!

Who is Centura Health?

Centura Health is the region's largest health care system. We connect individuals, families and neighborhoods across Colorado and western Kansas with more than 6,000 physicians and 21,000 of the best hearts and minds in health care. Through our 17 hospitals, two senior living communities, neighborhood health centers, physician practices and clinics, home care and hospice services, and Flight For Life® Colorado, our caregivers make the region's best health care accessible. We're on a mission to build flourishing communities and whole person care.

Bob Wilson Memorial Hospital Overview:

Bob Wilson Memorial Hospital is a 26-bed facility serving the community since 1951 with a comprehensive range of inpatient and outpatient services. For more than 60 years, Bob Wilson Memorial Hospital has provided access to health care close to home for the families of Ulysses, Kan. and surrounding communities.

Services include Case Management, CT Scan, Diabetic education, dietary consult, EEG/EKG, emergency care, laboratory, MRI, mammography, nuclear medicine, obstetrics (prenatal, postpartum, delivery), midwifery, primary and specialty clinics, physical therapy, radiology, respiratory therapy, surgery, swing beds and ultrasound.

Emergency Department:

The ED at Bob Wilson Memorial Hospital is a four-room department where we stabilize trauma patients for transfer, provide outpatient IV therapy, wound care, and have general surgery capability. The department receives overflow from rural health clinics, and we care for patients with general issues including migraines, appendectomy, abdominal pain, flu and pneumonia cases. Our team offers a flexible schedule where everyone orients to other units and gets to work in all departments. This allows associates to cross-train to med/surg and be marketable for future endeavors. Experience is preferred but not required as skills can be taught, but a personality that is outgoing and friendly with a willingness to help is key.

Medical Unit:

The Medical Unit at Bob Wilson Memorial Hospital is a 26-bed unit with an average census of eight to ten patients and one swing bed department incorporated to med/surg that is skilled nursing. The department covers general medical, surgery, all post-op, generalized pneumonia, flu, wound care (on skilled nursing side) and physical therapy. The clinical nursing program is new and offers a different/slower pace of training where a new nurse can acclimate and have time to learn our department better. We seek candidates that are flexible and willing to cross train to accommodate labor and delivery if needed.

OB Post Partum:

The OB Post-Partum department at Bob Wilson Memorial Hospital has five rooms, including the triage room. We work closely with nurse midwives and we offer an opportunity to learn about midwifery. We offer great exposure to a variety of spiritual and cultural diversity of patients within the community. OB nurses cross train to the medical/surgical unit and the emergency department. Applicants must have a great work ethic and be flexible with staffing.

Surgery:

The Surgery department at Bob Wilson Memorial has three operating rooms and one recovery room. Surgeries such as tonsils, general surgery and appendectomies are done with a small surgical crew and one surgeon. The patient mix is general surgery, hysterectomy, an occasional bowel resection and sometimes amputations. Overflow from ER or the med floor can occur at times. Candidates must be willing to learn and be open to cross training opportunities, attend all C-sections and want a variety of surgical exposure. Team members must take on-call rotations, live within 30 minutes of hospital and/or are willing to stay at the hospital when on call.
