By providing preventive health services and programs, Centura Health is helping to improve health and reduce the need for costly emergency treatment and acute care. Community benefits improve access, enhance health, advance medical or health knowledge, and relieve or reduce the burden of government.

Total Community Benefit: $14,277,373
Patient encounters supported with Medical Financial Assistance: 7,062
Total Community Impact: $43,192,208

Community Health Needs Selected With Our Community:

**Healthy Eating and Active Living/Obesity**

**Behavioral Health/Substance Abuse**

**Obesity**: Provided various evidence-based weight management programs to 93 community members at risk of type 2 diabetes.

**Behavioral Health**: Partnered with La Plata County Suicide Prevention Coalition to develop a Strategic Plan to reduce the suicide rate by 2025. Our team chairs the Protocol of Care Workgroup to develop a coordinated community response to behavioral health events. Additionally, we established tele-psychiatric services to better support the behavioral health needs of community members.

**Behavioral Health**: The Sexual Assault Nurse Examiner Program reached 59 sexual assault survivors with comprehensive care and support services to support healing.

**Access to Care**: Operated a part-time clinic in Silverton, CO to provide health care services to 490 underserved community members.
