Total Community Benefit: $1,013,389

Patient encounters supported with Medical Financial Assistance: 5,454

Total Community Impact: $8,822,479

Provided diabetes education to 93 people in the community to teach them about healthy habits.

Provided 186 sports physicals and readiness assessments for middle and high school athletes in Fremont County. These included assessment for injury prevention.

Provided Stop the Bleed Campaign to 72 people, educating them on how to respond to emergency bleeding.

Reached 190 people through health fairs to promote health education and behavior change to maintain health and access care appropriately.

Community Health Needs Selected With Our Community:

- Heart Disease
- Lung Disease
- Obesity/Overweight

By providing preventive health services and programs, Centura Health is helping to improve health and reduce the need for costly emergency treatment and acute care. Community benefits improve access, enhance health, advance medical or health knowledge, and relieve or reduce the burden of government.
